- Weight - 18kg depending on maturity and moisture content of turf.

## Biodiversity

- The turf naturally produces a bio-diverse habitat supporting birds, mammals, bees, butterflies and other invertebrate species.
- Additionally using Wildflower Turf will help to fulfil many modern requirements: Green corridors, BREEAM points, the Code for Sustainable Homes, drought tolerance, carbon and pollutant capture to name a few.
- In this seed mix there is a total of 31 flowering perennials and 3 grasses.

## Sustainability

- To produce this environmentally beneficial product, every effort is made to source sustainable ingredients, for example composted green waste and organic nutrients, as well as carefully monitoring all inputs such as electricity and water.
